### DETAILED ACTION

1. This action is in response to applicant's RCE received on June 25<sup>th</sup>, 2007.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kufel, Jr., et al (3,029,436) for the same reasons set forth in paragraph 7 of the Final Rejection mailed March 1<sup>st</sup>, 2007.

Regarding the amendments to claim 1, the staple has a first end and a second end, which are substantially perpendicular to the upper portion as can be seen in Fig. 6. In addition, the pusher 36 has a support surface (the entire top of the pusher including the stop of 38, 39, 41, and 36). It should be noted that the support surface is deemed to support the center in the lengthwise direction of the upper portion of the staple because it supports the entire staple by contacting the legs via faces 38 and the front surface of the pusher. Therefore, if the pusher was not present in Kufel's stapler, the staple (including the entire upper portion) would no longer be supported and would fall as stated in col. 3 lines 53-56).

***Response to Arguments***

4. Applicant's arguments filed May 21<sup>st</sup>, 2007 have been fully considered and are believed to have been addressed above.

Applicant contends that Kufel's pusher does not support the leading staple at the center. However, the examiner asserts that claims are given their broadest reasonable interpretation. In this instance, it should be noted that the claims are not limited to having a center portion of the support surface contact the center of the upper portion of the leading end of the staple. The claim only states that the support surface "supports the center in the lengthwise direction of the upper portion." The center is supported by the support surface via the legs.

For the reasons above, the grounds of rejection are deemed proper.

***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lindsay M. Low whose telephone number is 571-272-1196. The examiner can normally be reached on Monday thru Friday 7:30 to 5:00.

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
